Oroville Dam Auxiliary Spillway Incident (FINAL)

On 05/17/17 at 1830 hours, the California State Warning Center (CSWC) was advised by the Department of Water Resources (DWR) that they will begin reducing flows to the Feather River on 05/19/17 at 0530 hours.

- Total flow to the Feather River will decrease from 20,500 cfs to 10,550 cfs.
- Flows will continue to decline slowly from 10,550 to 5,300 cfs by 05/21/17 at 1200 hours.
- Hyatt Powerplant outflows will increase from 5,000 to 8,100 cfs.
- DWR will begin ramping down outflows from the main spillway on 05/19/17 at 0900 hours, outflows are expected to stop by the afternoon of 05/19/17.
- DWR intends to keep the spillway gates closed for the remainder of the season.
- This will be the final report for this incident unless significant activity warrants an update

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) as of 05/18/17 at 0600 hours:

- Inflow: 20,320 cfs.
- Outflow: 24,894 cfs.
- The current lake elevation is 832.17 feet.

Norovirus/Gastrointestinal Outbreak, Yolo and Sacramento Counties

On 05/15/17, the California Department of Public Health Duty Officer (CDPH DO) and California Department of Public Health Emergency Preparedness Office Duty Officer (CDPH EPO DO) reported to the CSWC that Yolo County has experienced a recent Norovirus/Gastrointestinal Outbreak that is affecting numerous schools in the county.

- 42 schools have been affected.
- 1,820 students, teachers, and staff are ill with stomach cramps, vomiting, and/or diarrhea in schools throughout Yolo County.
- Yolo County Health and Human Services is working with California Department of Public Health (CDPH) and the California Department of Pesticide Regulation (CDPR) regarding the concerns schools have using Bleach.
- Yolo County Health and Human Services will continue to work with Yolo County Office of Education to stop the spread.

Since 05/04/14, there have been reported outbreaks in schools in Sacramento County affecting students and staff. As of 05/16/17, the CDPH Duty Officer reports that:

- 19 public and private schools have reported these outbreaks.
- 1 specimen from an affected individual tested positive for Norovirus in the Sacramento Public Health Lab.

The California State Warning Center (CSWC) and California Department of Public Health (CDPH) continue to monitor the situation and will provide updates as they are received.

SITUATION SUMMARY

2017 February Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

Per the Cal OES Coastal Duty Officer (CDO), as of 05/16/17, full closures of Nacimiento-Fergusson Road are set to begin on 05/18/17 at 0800 hours. Motorists wishing to travel westbound should do so before the Caltrans bridge supply convoy delivering construction equipment and materials begins. Motorists wishing to travel eastbound towards US Highway 101 will be held at State Route 1 until the convoy passes.

Cal OES Inland Region

River Forecast - The following rivers are forecast to meet or exceed Flood stage:

Placer County:

- Placer County: Truckee River at Truckee is forecast to be at flood stage at 4.7 feet the morning of 05/22/17
 - Potential Impacts: Flood Stage. Minor flooding from Bear Creek in the Alpine Meadows area to Truckee. Truckee River bike path between the River Ranch at Alpine Meadows Road to Tahoe City begins to flood.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Alpine County: West Fork Carson River at Woodfords; East Fork Carson River at Markleeville
- Stanislaus County: Tuolumne River at Modesto
- Merced County: Merced River at Stevinson

WEATHER SYNOPSIS BY REGION

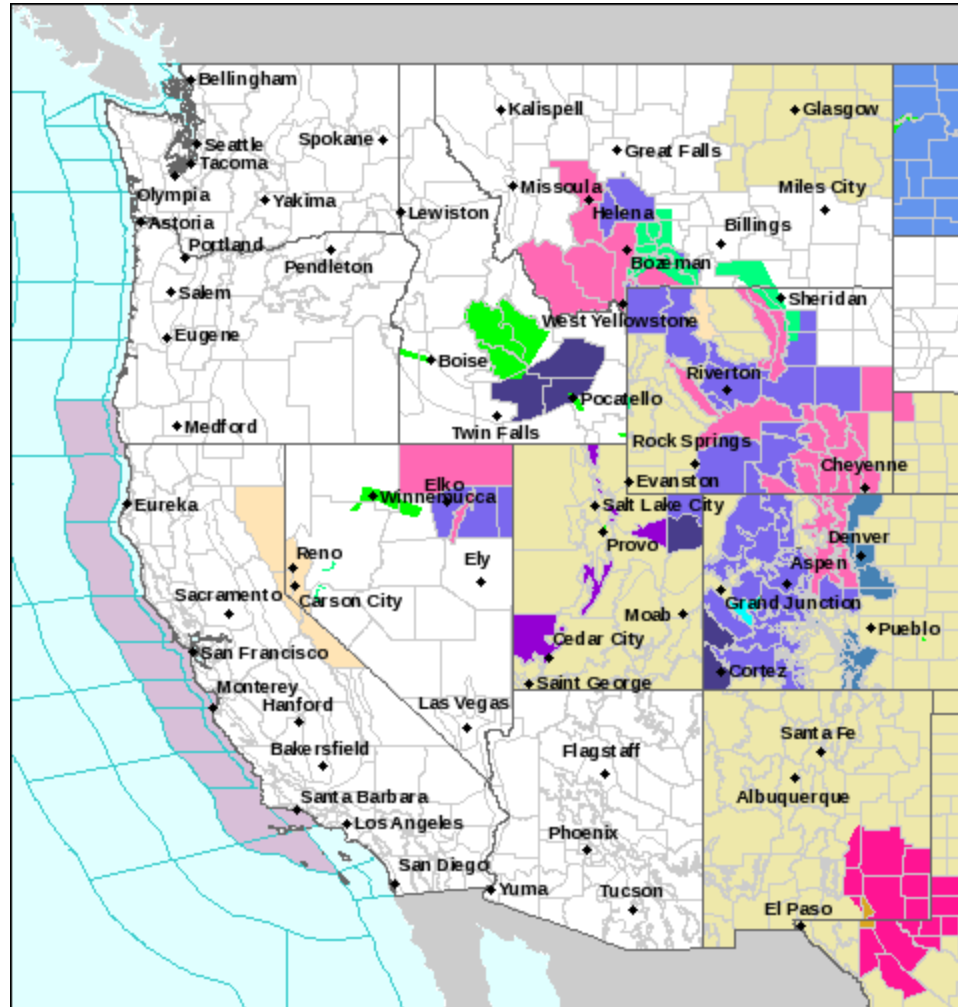

NORTHERN CALIFORNIA

Low pressure in the Great Basin will continue moving off to the east as high pressure over the eastern Pacific begins to build over Northern California today. However, a few isolated showers or thunderstorms are still possible in the eastern mountains. The high pressure will remain fairly strong over Northern California until Saturday afternoon. Temperatures will rise to 8-12 degrees above normal by Friday and Saturday. North-Northwest winds will gust to 15-25 mph, with a few locations east of the Cascade-Sierra crest seeing gusts of 35 mph. Northwest-Northeast winds Thursday through midday Saturday will be nearly as strong. Late on Saturday the high pressure will weaken a bit as a low pressure trough moves in from the north. Although temperatures will remain well above normal, unstable conditions from the trough will lead to afternoon buildups over the higher terrain Saturday, with a stray shower or thunderstorm possible. The trough will remain over the area and deepen for several days, leading to a daily chance of afternoon and evening showers and thunderstorms from Sunday through much of next week, primarily in the mountains.

SOUTHERN CALIFORNIA

A cold low pressure area departing the area will produce strong northwesterly flow over many areas. Strong winds of 20-30 mph with gusts to 50 mph will be possible across the central coast and Santa Barbara County, the Kern County Mountains and most of the desert north of I-40. The strong winds will generate some upslope drizzle or light shower activity over the far southern San Joaquin Valley and the Grapevine as well as the northern Sierras. A trace to a quarter of an inch of rain can be expected in these areas. Otherwise, expect mostly sunny skies and cool temperatures once again with highs in the 50s in the mountains to the 60s and lower 70s in the valleys. The flow will turn northerly, leading to infrequent wind gusts to 45 mph across the Santa Ynez Range and the I-5 Corridor. These winds will slowly decrease Thursday afternoon. High pressure over the Pacific will draw closer to the area by the weekend, leading to much warmer weather. Highs Thursday will climb 8-12 degrees over many valley areas as the marine layer retreats. By the weekend, expect valley and lower foothill regions to be in the mid 90s with desert readings topping 105°. Winds will be light over the weekend. Expect minimum relative humidity to drop toward the 10-15% range each afternoon below 3,000 feet. A return of onshore flow will bring slightly cooler weather back to the coast early next week, but most inland areas will remain seasonally warm. No additional rainfall is expected during the extended period.
